

# Arch

## Basic Setup

Missing japanese / non ascii characters:

```
yay -S noto-fonts-cjk noto-fonts-emoji noto-fonts
```

## nextcloud-client

To get nextcloud-client working with the keychain you need to install following packages:

- libgnome-keyring
- qtkeychain
- gnome-keyring

Otherwise nextcloud-client will ask every login for credentials.

## Splash Screen

Using plymouth & plymouth-encrypt
